DANH SÁCH CÁC BÀI BÁO
ĐƯỢC CẬP NHẬT TRÊN MATHSCINET
TRONG NĂM 2011

1. Duc, Duong Minh; Lam, Ho Si Tung; Thang, Nguyen Quang; Vu, Dinh Cao Duy Thien On Harnack's inequality for non-uniformly p-Laplacian equations. *Acta Math. Vietnam.* 36 (2011), no. 2, 199–214. (Reviewer: Filomena Feo) 35J62 (35B45 35B65)

2. Bui Xuan Hai On locally nilpotent maximal subgroups of the multiplicative group of a division ring. *Acta Math. Vietnam.* 36 (2011), no. 1, 113–118. (Reviewer: Mohammad Mahdavi-Hezavehi) 16K20 (20F19)

3. Nguyen-Xuan, H.; Nguyen-Thanh, N.; Kiendl, J.; Wüchner, R.; Bletzinger, K. U.; Bazilevs, Y. Rotation free isogeometric thin shell analysis using PHT-splines. *Comput. Methods Appl. Mech. Engrg.* 200 (2011), no. 47-48, 3410–3424. 74K25 (74S05)

4. Nguyen-Xuan, H.; Vu-Bac, N.; Chen, L.; Bordas, S.; Kerfriden, P.; Simpson, R. N.; Liu, G. R.; Rabczuk, T. A node-based smoothed extended finite element method (NS-XFEM) for fracture analysis. *CMES Comput. Model. Eng. Sci.* 73 (2011), no. 4, 331–355. 74R10 (65N30 74S05)

5. Nguyen-Xuan, H. ;Nguyen-Thoi, T.; Liu, G. R.; An n-sided polygonal edge-based smoothed finite element method (nES-FEM) for solid mechanics. *Int. J. Numer. Methods Biomed. Eng.* 27 (2011), no. 9, 1446–1472. 74S05 (65N30)

6. Nguyen-Xuan, H.Nguyen-Thanh, N.; ; Bordas, S. P. A.; Rabczuk, T. Isogeometric analysis using polynomial splines over hierarchical T-meshes for two-dimensional elastic solids. *Comput. Methods Appl. Mech. Engrg.* 200(2011), no. 21-22, 1892–1908. (Reviewer: Manfred Tasche) 65D17 (65D07 65N30 68W25 74S05)

7. Nguyen-Xuan, H.;Thai-Hoang, C.; Nguyen-Thanh, N.; Rabczuk, T. An alternative alpha finite element method with discrete shear gap technique for analysis of laminated composite plates. *Appl. Math. Comput.* 217 (2011), no. 17, 7324–7348. 74K20 (65N30 74E30 74S05)

8. Nguyen-Xuan, H.; Nguyen-Thoi, T.; Liu, G. R.; Nguyen-Tran, C. Adaptive analysis using the node-based smoothed finite element method (NS-FEM). *Int. J. Numer. Methods Biomed. Eng.* 27 (2011), no. 2, 198–218. 65N30 (65N50)

9. Nguyen-Xuan, H.; Liu, G. R.; Nguyen-Thoi, T. A variationally consistent $\alpha{\rm FEM}\ ({\rm VC}\alpha{\rm FEM})$ for solution bounds and nearly exact solution to solid mechanics problems using quadrilateral elements. *Internat. J. Numer. Methods Engrg.* 85 (2011), no. 4, 461–497. 74S05 (65N30)

10. Phan Quoc Khanh; Nguyen Dinh Tuan Optimality conditions without continuity in multivalued optimization using approximations as generalized derivatives. *Topics in nonconvex optimization,* 47–61, Springer Optim. Appl., 50, *Springer, New York,* 2011. 49J52 (90C29 90C46)

11. Khanh, P. Q.; Long, V. S. T.; Quan, N. H. Continuous selections, collectively fixed points and weak Knaster-Kuratowski-Mazurkiewicz mappings in optimization. *J. Optim. Theory*

Appl. 151 (2011), no. 3, 552–572. (Reviewer: Valeri Obukhovskiĭ) 47H10 (47J20 49J40 54C65 54H25 91B02 91B50)

12. Khanh, P. Q.; Tuan, N. D. Corrigendum to "Optimality conditions using approximations for nonsmooth vector optimization problems under general inequality constraints" [MR2531198]. *J. Convex Anal.* 18 (2011), no. 3, 897–901. (Reviewer: Riccardo Cambini) 90C29 (90C46 90C48)

13. Khanh, Phan Quoc; Anh, Lam Quoc; Van, Dang Thi My Well-posedness without semicontinuity for parametric quasiequilibria and quasioptimization. *Comput. Math. Appl.* 62 (2011), no. 4, 2045–2057. (Reviewer: Devidas V. Pai) 49K40 (90C31 90C48)

14. Khanh, Phan Quoc; Anh, Nguyen Le Hoang; Tung, Le Thanh Higher-order radial derivatives and optimality conditions in nonsmooth vector optimization. *Nonlinear Anal.* 74 (2011), no. 18, 7365–7379. 49J52 (90C29)

15. Khanh, Phan Quoc; Quyen, Ho Thuc; Yao, Jen-Chih Optimality conditions under relaxed quasiconvexity assumptions using star and adjusted subdifferentials. *European J. Oper. Res.* 212 (2011), no. 2, 235–241. (Reviewer: Xue Xiang Huang) 90C48 (49J52 90C46)

16. Khanh, P. Q.; Tuan, N. D. Second-order optimality conditions using approximations for nonsmooth vector optimization problems under inclusion constraints. *Nonlinear Anal.* 74 (2011), no. 13, 4338–4351. (Reviewer: Bienvenido Jiménez) 90C29 (49J52 90C46 90C48)

17. Khanh, Phan Quoc; Hoang Anh, Nguyen Le; Tung, Le Thanh Variational sets: calculus and applications to nonsmooth vector optimization. *Nonlinear Anal.* 74 (2011), no. 6, 2358–2379. 49J52 (90C29)

18. Khanh, P. Q.; Quy, D. N. On generalized Ekeland's variational principle and equivalent formulations for set-valued mappings. *J. Global Optim.* 49 (2011), no. 3, 381–396. (Reviewer: Christiane Tammer) 49J53 (47H04 47N10 90C29 90C48)

19. Khanh, P. Q.; Quan, N. H. Generic stability and essential components of generalized KKM points and applications. *J. Optim. Theory Appl.* 148 (2011), no. 3, 488–504. (Reviewer: Enrico Miglierina) 90C31 (47H10 47J20 49K40 91B50)

20. Khanh, Tran Vu; Zampieri, G. Estimates for regularity of the tangential $\overline{\partial}$-system. *Math. Nachr.* 284 (2011), no. 17-18, 2212–2224. (Reviewer: Phillip S. Harrington) 32W05 (32F10 32F32 32T25 35N15)

21. Khanh, Tran Vu; Zampieri, Giuseppe Subellipticity of the $\overline\partial$-Neumann problem on a weakly q-pseudoconvex/concave domain. *Adv. Math.* 228 (2011), no. 4, 1938–1965. (Reviewer: Debraj Chakrabarti) 32W05

22. Nguyen Thanh Long ; Le Thi Phuong Ngoc; Le Khanh Luan; An asymptotic expansion of a weak solution for a nonlinear wave equation. *Acta Math. Vietnam.* 36 (2011), no. 3, 695–722. 35L72 (35C20 35D30)

23. Nguyen Thanh Long ; Le Thi Phuong Ngoc; Le Khanh Luan; Tran Minh Thuyet; On a nonlinear wave equation associated with Dirichlet conditions: solvability and asymptotic

expansion of solutions in many small parameters.*ISRN Appl. Math.* **2011,** Art. ID 625908, 33 pp. 35L72 (35B25 35C20 35D30 35L20)

24. Long, Nguyen Thanh ;Ngoc, Le Thi Phuong; Thuyet, Tran Minh; Son, Pham Thanh; On a nonlinear wave equation with a nonlocal boundary condition. *Acta Math. Vietnam.* 36 (2011), no. 2, 345–374. 35L72 (35D30 35L20)

25. Nguyen Thanh Long;Le Thi Phuong Ngoc; A high order iterative scheme for a nonlinear Kirchhoff wave equation in the unit membrane. *Int. J. Differ. Equ.* **2011,** Art. ID 679528, 31 pp. 35A35 (35L20 35L70 65M12)

26. Long, Nguyen Thanh ;Ngoc, Le Thi Phuong; The existence of asymptotically stable solutions for a nonlinear functional integral equation with values in a general Banach space. *Nonlinear Anal.* 74 (2011), no. 18, 7111–7125.47H10 (45G99 47N20 65J15)

27. Long, Nguyen Thanh ;Truong, Le Xuan; Ngoc, Le Thi Phuong; Dinh, Alain Pham Ngoc; Existence, blow-up and exponential decay estimates for a nonlinear wave equation with boundary conditions of two-point type. *Nonlinear Anal.* 74 (2011), no. 18, 6933–6949. 35L71 (35B40 35B44 35L20)

28. Long, Nguyen Thanh ;Truong, Le Xuan; Ngoc, Le Thi Phuong; Hoa, Cao Huu; On a system of nonlinear wave equations associated with the helical flows of Maxwell fluid. *Nonlinear Anal. Real World Appl.* 12 (2011), no. 6, 3356–3372. 35L76 (35A01 35A02 35A35 35B40 35B65 35D30)

29. Long, Nguyen Thanh ;Ngoc, Le Thi Phuong;Applying a fixed point theorem of Krasnosel skii type to the existence of asymptotically stable solutions for a Volterra-Hammerstein integral equation. *Nonlinear Anal.* 74 (2011), no. 11,3769–3774. (Reviewer: Murat Adıvar) 45G99 (45D05 47H10 47H30 47N20)

30. Long, Nguyen Thanh ;Ngoc, Le Thi Phuong; Luan, Le Khanh; Thuyet, Tran Minh; On a nonlinear wave equation with boundary conditions involved in a Cauchy problem. *Nonlinear Anal. Real World Appl.* 12 (2011), no. 1, 69–92.35L75 (35D30)

31. Pham Hoang Quan; Phan Trung Hieu A new regularization method for the Cauchy problem of the Helmholtz equation with nonhomogeneous Cauchy data. *Acta Math. Vietnam.* 36 (2011), no. 2, 419–430. (Reviewer: Serge Lvin) 35R25 (31A25 35J05 42A38)

32. Pham Hoang Quan ;Nguyen Huy Tuan; A spectral regularization method for a heat equation backward in time on the plane. *ROMAI J.* 7 (2011), no. 1, 171–182. 35R25 (35K05 47A52)

33. Quan, Pham Hoang ;Tuan, Nguyen Huy; Some extended results on a nonlinear ill-posed heat equation and remarks on a general case of nonlinear terms. *Nonlinear Anal. Real World Appl.* 12 (2011), no. 6, 2973–2984. 35R25 (35K91)

34. Quan, Pham Hoang ;Tuan, Nguyen Huy;A Cauchy problem for Helmholtz equation: regularization and error estimates. *Acta Univ. Apulensis Math. Inform.* No. 25 (2011), 177–188. (Reviewer: Nasser H. Sweilam) 65N20 (35J05 35R25)

35. Trong, Dang Duc Tuan, Nguyen Huy; A note on a nonlinear backward heat equation: stability and error estimates. *Acta Univ. Apulensis Math. Inform.* No. 28 (2011),279–292. 35B35

(35K20 35R30 47H10)

36. Trong, Dang Duc; Dien, Nguyen Minh Regularization of a backward heat transfer problem with a nonlinear source. *Acta Math. Vietnam.* 36 (2011), no. 2, 505–515. (Reviewer: Elena Tabarintseva) 35K59 (35R25 47J06)

37. Trong, Dang Duc; Tuan, Nguyen Huy; Quan, Pham Hoang Notes on a new approximate solution of 2-D heat equation backward in time. *Appl. Math. Model.* 35 (2011), no. 12, 5673–5690. 35R25 (35K20 65M30)

38. Trong, Dang Duc; Quan, Pham Hoang; Triet, Le Minh; Tuan, Nguyen Huy A modified quasi-boundary value method for regularizing of a backward problem with time-dependent coefficient. *Inverse Probl. Sci. Eng.* 19 (2011), no. 3, 409–423. 35R25 (65M30)

39. Trong, Dang Duc ;Tuan, Nguyen Huy; A simple regularization method for the ill-posed evolution equation. *Czechoslovak Math. J.* 61(136) (2011), no. 1, 85–95. (Reviewer: Dinh Nho Hào) 65M32 (34G10 35K90 35R25 47N20)

40. Trong, Dang Duc ;Tuan, Nguyen Huy; Two regularization methods for backward heat problems with new error estimates. *Nonlinear Anal. Real World Appl.* 12 (2011), no. 3, 1720–1732. 65M30 (65M15)

41. Trong, Dang Duc; Tuan, Nguyen Huy; Quan, Pham Hoang; Nhat, Nguyen Do Minh A nonlinear backward parabolic problem: regularization by quasi-reversibility and error estimates. *Asian-Eur. J. Math.* 4 (2011), no. 1, 145–161. (Reviewer: Peter G. Danilaev) 35R25 (35A35 35K90 35K91 47H10 47J06)

42. Trong, Dang Duc; Tuan, Nguyen Huy; Quan, Pham Hoang A modified integral equation method of the semilinear backward heat problem. *Appl. Math. Comput.* 217 (2011), no. 12, 5177–5185. 65M30 (35K58 35R30)

43. Nguyen-Thoi, T.; Chen, L.; Zhang, G. Y.; Zhang, J.; Tang, Q. An adaptive edge-based smoothed point interpolation method for mechanics problems. *Int. J. Comput. Math.* 88 (2011), no. 11, 2379–2402. 65N99 (65N15 65N50 74S30)
